

Peel Clothworkers' Primary School

'Enjoyable learning for life'

Home Learning: W/B - Monday 23 March

Year 1

Writing

Instructions

Write a set of instructions for something that you have completed this week. This could be something that you have made, some baking that you have done, planting or gardening, a new skill with a bat or ball.

Objectives:

- Use clear and relevant vocabulary to portray information.
- Independently construct and write simple sentences,
- Introduce headings, bullet points and labelled diagrams linked to non-narrative texts.
- Include the main features of non narrative text (instructions) in written text.

Reading

Instructions

Find your favourite recipe in a recipe book at home or online. Read the recipe through together and discuss the features. Make the recipe together if you have time.

Objectives:

- Distinguish between fiction and non fiction and the purpose for reading.
- Link personal experiences to texts commenting on ideas and events.

Maths

Number - Fractions

Objectives:

- Recognise, find and name a half as 1 of 2 equal parts of an object, shape or quantity.

Challenge 1:

Find as many objects around the house as you can that can be split equally in half. E.g Half a cake, Half a pizza, Half a door, Half of a Lego brick. Focus on the fact that for it to be a half both parts of 2 have to be equal. Write down or take pictures of those that you find.

Challenge 2:

Investigate which shapes you can split into halves. Do some shapes have more than one way that they can be halved? Show the different ways. Can you group shapes by how many times that they can be halved? Focus on matching each side of the shape to ensure that it is a half.

Challenge 3

Use practical methods to find halves of quantities up to 20. Use objects in your house to help such as Lego, toy cars, cutlery etc. Be as imaginative as you can with the things you use and record what you find out.

Science

Life Processes - Plants

Objectives:

- Identify and describe the basic structure of a variety of common flowers and plants including trees.

Draw some common plants or trees that are found on the Isle of Man. Do these from your garden or use the internet or books to help you find pictures of native plants.

Label each part of the plant or tree that you have drawn and challenge yourself by writing a sentence to describe what each part of the plant does. We have learnt about this in class already over this half term so show your parents or others at home how much that you have learnt.

Cross Curricular Challenge

Hey, isn't it time for

The Arts and Crafts Badge.

Objectives:

- Use ideas and your own experiences to generate ideas.
- Select appropriate tools, techniques and materials.
- Use a combination of techniques in one piece of work.
- Describe what I think about my work.

Choose any type of art or craft to create a representation of your favourite activity. You could use drawing, painting, collage, model making, sewing, baking or any other method that you enjoy.

Think about how you can use the materials or techniques that you choose to best represent your activity. Your activity could be something that you are not able to do at the moment but would like to show. Discuss why you have chosen your techniques and methods. Evaluate what you have made by thinking about what went well and if there were any parts that you would change or improve next time.

PE

Ball Skills

Objectives

- throw, catch and kick a variety of different objects and balls.
- hit a ball with a variety of different bats.
